PROFILE

Software Developer and founder of a digital services company, with extensive experience in admin support, CRM systems, and digital sales. Fast learner and team leader with a track record of building websites, running Google Ads, creating graphic design/video content, and managing client workflows end-to-end. Previously published video content for a national college brochure and worked in a debt collection call centre, so I bring strong technical skills + professionalism + clear communication. Known for turning complex requirements into clean, efficient solutions while keeping operations organized.
